

Computers without plugs, ask us how...

Our **ultra-low energy infrastructures** supply Power-over-Ethernet (PoE) to deliver **efficient, high performance computing**.

PoE Computing

Ele offers solutions to power a variety of NUC devices via a single ethernet cable. We've developed a specific lid to fit with Intel's product line alongside a range of mounting solutions to fit other devices on the market.

Sustainable Design

Built from **100% recycled** plastic and assembled in seconds.

Ele Board

A **single ethernet cable** to power a computer and monitor.

Intel NUC Lids

Designed to fix seamlessly to Intel's range of NUCs.

Power any Intel NUC

Our PoE Supply Unit powers **a wide range of devices**, offering an adaptable computing solution.

Intel NUC Lid

A unique snap fit solution for Intel's selection of NUCs

Installation Flexibility

Our infrastructure can be fixed to a monitor without impeding access to VESA mounts.

Universal Design

Designed to sit beside a range of form factors, the customer can choose the NUC that best suits their requirements
